

Affordable because we focus ONLY on equine medication

AbActive™

COMPOSITION:

Each sachet contains;
Probiotic B. coagulans ... 45,000 million cfu (Lactobacillus sporogenes)
(As enteric coated granules)

DESCRIPTION:

AbActive™ probiotic helps restore natural intestinal flora, leading to more rapid recovery and better nutrient absorption, easy-to-feed once a day dosages of flavorless blue, enteric coated granules containing a probiotic.

INDICATION:

Probiotics help restore natural intestinal flora and are a great supplement to help horses that have experienced a shock to its system, such as colic, or even a course of antibiotics. In restoring majority of natural lactic acid bacteria, foods are then more efficiently digested.

DOSAGE:

Treatment:

Recommended dosage: One sachet per 350kg (770lb) per day.
Frequency: Ongoing

ADMINISTRATION:

Simply sprinkle AbActive™ onto feed. For fussy eaters mix with molasses or corn syrup then mix with feed, apple or a treat.

OVERDOSAGE:

Should a massive overdose occur, treat symptomatically and supportively.

SIDE EFFECTS:

Probiotics occur naturally in the digestive system and treatment has no known side effects.

AbActive
product information
