COMPOSITION

Each 4.2g sachet contains; Omeprazole BP ... 700mg
Probiotic B. coagulans 21,000 million cfu
(Lactobacillus sporogenes)
(As enteric coated granules)

AbPrazole Plus™
product information

DESCRIPTION

AbPrazole Plus™ is for treatment and prevention of equine gastric ulcers in easy-to-measure, easy-to-feed once a day dosages of flavorless blue granules containing Omeprazole, PLUS a pharmaceutical grade probiotic. The presence of a probiotic helps restore natural intestinal flora, leading to more rapid recovery and better nutrient absorption.

Omeprazole is from the family of proton pump inhibitors (PPI's) that blocks secretion of acid and assists by reducing and neutralizing acid in the horse's stomach allowing improved healing of existing ulcer damage. The presence of a probiotic helps restore natural intestinal flora, leading to more rapid recovery and better nutrient absorption.

INDICATIONS

For treatment and prevention of equine gastric ulcer syndrome - (EGUS) in horses.

DOSAGE

Omeprazole, the active ingredient in AbPrazole Plus™, recommended treatment dosage of 4.0mg/kg 1.8mg/kg (0.9mg/lb) of horses bodyweight, and a recommended prevention dosage of 2.0mg/kg (0.9mg/lb) of horses bodyweight.

Recommended Dosage: once-a-day

Treatment: 4.0mg/kg (1.8mg/lb) bodyweight

One sachet per 175kg (385lb) per day

Regime: 28 days

Prevention: 2.0mg/kg (0.9mg/lb) bodyweight

One sachet per 350kg (770lb) per day

Regime: ongoing as required

ADMINISTRATION

Simply sprinkle AbPrazole Plus™ dry onto feed. For fussy eaters mix with molasses or corn syrup then mix with feed, apple or a treat.

OVERDOSAGE

Massive overdosage is required to cause problems in other species but the toxic dosage in horses is uncertain. Rats have tolerated oral doses no greater than 40mg/kg, this would be equivalent to **ten times** of 100% product fed to a horse at one time. Should a massive overdose occur, treat symptomatically and supportively.

SIDE EFFECTS

Omeprazole like other PPI's is well tolerated. Nervousness, abnormal heartbeat, muscle pain, weakness, leg cramps and water retention occur infrequently. Probiotics occur naturally in the digestive system and treatment has no known side effects.

INTERACTIONS OR CONTRAINDICATIONS

Omeprazole appears to be a safe drug with low associated problems. It is contraindicated in horses hypersensitive to it. Omeprazole may decrease the hepatic clearance of some medications. Omeprazole's safety during pregnancy has not been established.

TOXICITY

Omeprazole appears to be very well tolerated in horses. The probiotic minimizes the possibility of Gastro Intestinal (GI) distress (anorexia, colic, flatulence, diarrhea).

WARNINGS

Do not use on horses intended for human consumption.

Keep out of reach of children.

Veterinary use only.

STORAGE

Store in a cool dry atmosphere away from extreme heat.

Store/Transport at and 20° to 30°C (68° to 86°F)
