

Affordable because we focus ONLY on equine medication

## AbPrazole™

Omeprazole 25% w/w

### COMPOSITION

Each 2.8g sachet contains  
Omeprazole BP ... 700mg  
(As enteric coated granules)

### DESCRIPTION

AbPrazole™ (Omeprazole) for the treatment and prevention of equine gastric ulcers in easy-to-measure, easy-to-feed once-a-day dosages of flavorless, blue, enteric coated granules.

Omeprazole is from the family of proton pump inhibitors (PPI's) that blocks secretion of acid and assists by reducing and neutralizing acid in the horse's stomach allowing improved healing of existing ulcer damage.

### INDICATIONS

For treatment and prevention of equine gastric ulcer syndrome (EGUS) in horses.

### DOSAGE

Omeprazole, the active ingredient in AbPrazole™, has a recommended treatment dosage of 4.0mg/kg (1.8 mg/lb) of your horses bodyweight, and a recommended prevention dosage of 2.0mg/kg (0.09 mg/lb) of your horses bodyweight.

### TREATMENT

One sachet per 175kg (385lb) per day  
**Regime:** 28 days

### PREVENTION

One sachet per 350kg (770lb) per day  
**Regime:** Ongoing

### ADMINISTRATION

Simply sprinkle AbPrazole™ dry onto feed. For fussy eaters mix with molasses or corn syrup then mix with feed, apple or a treat.

AbPrazole  
product information

## OVERDOSAGE

Massive overdosage is required to cause problems in other species but the toxic dosage in horses is uncertain. Rats have tolerated oral doses no greater than 40mg/kg, this would be equivalent to ten times of 100% product fed to a horse at one time. Should a massive overdose occur, treat symptomatically and supportively.

## SIDE EFFECTS

Omeprazole like other PPI's is well tolerated. Nervousness, abnormal heartbeat, muscle pain, weakness, leg cramps and water retention occur infrequently.

## INTERACTIONS OR CONTRAINDICATIONS

Omeprazole appears to be a safe drug with low associated problems. It is contraindicated in horses hypersensitive to it. Omeprazole may decrease the hepatic clearance of some medications. Omeprazole's safety during pregnancy has not been established.

## TOXICITY

Omeprazole appears to be very well tolerated in horses. There may be a possibility of Gastro Intestinal (GI) distress (anorexia, colic, flatulence, diarrhea).

## WARNINGS

Do not use on horses intended for human consumption.  
Keep out of reach of children.  
Veterinary use only.

## STORAGE

Store in a cool dry atmosphere away from extreme heat.  
Store/Transport at 20° to 30°C (68° to 86°F)
